

# Web 3 Has a Problem

Crypto adoption is rising fast— but most people are entering without the tools, context, or protection they need to succeed.

Over \$30 billion lost to scams since 2021  
Most platforms are built for experts, not everyday users  
Key insights are buried in noise, hype, and misinformation  
New users are overwhelmed, underprepared, and often misled

Overwhelmed

Underprepared

Misled

The result:

Costly mistakes, missed opportunities, and declining public trust.  
It shouldn't be this hard.

Web3 needs a better on-ramp

one built for curiosity, clarity, and real understanding.

# Cointel Has The Solution

A **smarter, safer** way into Web3.

Cointel is an AI-native crypto platform built to onboard and empower the next 100 million users. From first-time learners to advanced traders, it delivers gamified learning, predictive analytics, and real-time tools — all under one seamless subscription.

At its core: edutainment — verified crypto intelligence delivered in a way that's engaging, interactive, and actionable.

## The Cointel Difference

### AVA:

Custom AI Avatar providing custom, visual, multilingual lessons—making complex topics feel personal and approachable.

### Gamified Learning:

Earn badges, unlock tools, and level up through the Cointel Campus as you master key concepts.

### News Summaries:

Short, AI-curated video briefs delivered three times daily to keep users informed.

### Smart Alerts:

Personalized notifications on price movements, whale activity, new DEX listings, and network trends.

### AI Chat:

Ask Cointel Oracle questions, get token breakdowns, and receive custom alerts or portfolio updates.

### Voice Access:

A voice-first interface delivering crypto news and education in audio format, built for users with limited connectivity or language barriers.

### Predictive Analytics:

Fresh insights every six hours, including technical indicators, sentiment trends, and token forecasts.

### AI Reports:

Deep research into trending tokens, narratives, and ecosystems.

### Expert 1:1 Q&A:

Access to clear, personalized answers for your crypto questions provided by real, vetted experts.

### Scam Alerts:

Up-to-date news on known scams and suspicious addresses related to major tokens.
